**\*\*\*\*\*NEW DATE \*\*\*\*\***

### **OPPORTUNITY TO PHOTOGRAPH CONSTRUCTION OF THE WORLD'S FIRST HYBRID TUG**

*Foss Rainier Shipyard Opens its Doors During Construction for  
Sneak Peek of Ground-Breaking Vessel*

**Who:** Foss Maritime Company invites interested members of the media to get a sneak peek of the world's first Hybrid Tug while it is still in construction at its Rainier, Oregon shipyard.

**When:** **September 9, 2008** (\*\*please note new date\*\*) 11:00 a.m. to 1:00 p.m.

**Where:** Foss Rainier Shipyard  
611 East 'A' Street  
Rainier, OR 97048  
503.556.2396

**What:**

- Foss' first Hybrid Tug combines batteries, generators and main engines to reduce air pollution and offer greater fuel economy.
- The technology used is flexible and can be used to convert other standard tugs.
- The Hybrid Tug design was awarded the EPA's Clean Air Excellence Award for Clean Air Technology earlier this year.

Contact [Meaganoshea@foss.com](mailto:Meaganoshea@foss.com) to RSVP for the event or to obtain technical specifications and more information about the Hybrid Tug.
