

Safety Policy

It is the policy of Foss Maritime Company to provide its employees with a safe and healthful working environment. Employees are encouraged to promote conditions, practices and attitudes which establish such an environment.

Every manager is accountable to maintain the standards, which are required to fulfill these basic principles. These standards shall apply to the condition of facilities and equipment, establishment of safety objectives, and endorsement and support of the program. Through proper training and education, all employees will have a clear perception of what is expected from them regarding safety performance.
