

# Foss Maritime Company | Vendor Placard

## Safety Vision |

Our Company-wide safety culture guides each one of us to work together for an incident free workplace, where injuries are not accepted as the cost of doing business.

**All subcontractors, vendors and shipyard personnel are expected to comply with Foss safety, security, environmental policies and the code of ethical conduct while engaged in work on Foss Maritime equipment or property.**

**As a Foss Maritime Company Vendor I will....**

- always start my work with pre-task planning, JSA and a safety meeting with all involved personnel.
- wear approved safety equipment (PPE) including safety glasses in all work areas.
- VERIFY isolation of energy (LOTO) before work begins.
- only enter confined spaces that are certified by a Marine Chemist or Shipyard Competent Person.
- only work with a valid hot work permit when required.
- report all incidents and injuries to responsible Foss Manager & my supervisor as soon as possible.
- protect myself from falls when working above 5 feet.
- not walk or work under suspended loads.
- maintain my work area free of hazards at all times.
- use my stop work authority when exposure increases beyond the plan.
